

The Farm - As You've Never Seen It!

The signs that you never want to see in what you think is a healthy tree.

Squirrels are cute, until they ruin your lawn with their digging.

Squirrels are fun to watch as they chase each other through and around about the trees, until they leave your yard a mess with branches they've used to sharpen their teeth.

Squirrels in Disney documentaries are sweet creatures as they nestle all together in a warm furry pile inside of a hole in the tree.

Unless their habitat is in the middle of a tree that has been dropping a good quantity of dead branches during wind storms.

When those two things happen together . . . it's a sign a tree is pretty much becoming a danger to everything under it or around it.

And so it was . . .

The tree service brought the tree down exactly where it was supposed to go, but in the exuberance of hitting the ground, it gave a bounce and the Strong Family Farm sign it did trounce.

Fortunately the sign was the only thing that was damaged.

The old tree had provided many years of beauty and shade. With it gone, the farm has a whole new look!
